### Target Audience

The target audience are middle and senior managers from aid and development organisations working within transport, logistics or administration units.

It is also suited for those who are aspiring to middle and senior management positions in specialist functional areas such as supply chain management, transport planning or transport operations.

### Designed for Aid & Development Organisations

In the Fleet Management Fundamentals Training you will learn the foundation principles of fleet management in humanitarian context in order to increase the proficiency and expertise of humanitarian professionals working at an operational level.

By the end of the course, you will:

- Determine the right number and types of vehicles for your operation;
- Implement strategies to reduce fleet costs;
- Understand the root causes of your crashes;
- Introduce and monitor KPIs that are related to your organisation's priorities;
- Get insight and lower your vehicle emissions.

How will this benefit my organisation?

During the training, you will work on your 6-month action plan that you can implement after. The plan will help you increase service delivery, reduce road crashes and carbon emissions of your fleet and also save money for your organisation, and may include:

- Developing transport plan for a specific project;
- Conducting a rightsizing exercise to determine the optimal size of the fleet;
- Introducing vehicle pooling system for staff;
- Implementing driver performance reviews, using data collected through tracking systems;
- Building the business case for hybrid vehicle;

Fleet management experts will provide you with the knowledge resources and peer sessions to guide you with implementing your plan.

What will I get if I purchase the Fundamentals training?

When you purchase this training, you get access to:

- Downloadable training materials;
- 1-year access to the Training Portal;
- Digital resources on the Knowledge Platform to help you implement;
- Personalised guidance for upto 6 months after.

Upon completing the training, your electronic Certificate of Participation will be added to your Personal page - from there, you can print your Certificate or add it to your LinkedIn profile, on printed resumes, CVs, or other documents.

If you successfully complete the implementation of your plan after the training, you will receive a Certificate of Achievement and you will be able to attend our invitation-only Fleet Management Pro training.

We work with group sizes of 10 -12 participants per training. Registration does not guarantee a spot. We will review the registrations received and contact you via email.

The expected workload is about 2.5 hours per day during a 10-day period:

- 1.5 hours per day is self-study, which consists of completing e-learning modules, solving real-life case studies, preparing exercises.
- Once a day, we will have 1-hour 'live' discussions (via video-conferencing). These sessions will take place in the morning and afternoon and are mandatory to attend to receive your certificate at the end of the training.

#### What do our Trainees say:

"This was my first virtual training. The group discussions were very lively, similar to classroom trainings. The benefit of virtual training is I could combine with important office work also side by side"

"After the training, I used the TCO method to get my management to agree to dispose of 7 to 8 old vehicles. This training helped me to be more convincing to my management"

"The practical aspects of the training translated into immediate application in our day-to-day operations, leading to more efficient processes and noticeable cost savings in our fleet management."

"I particularly liked the follow-up plan on our action plans in the form of monthly meetings. The monthly meetings kept us accountable and will surely ensure continuity from training to implementation."

"The approach of combining self-paced learning with interactive sessions made the training very effective. Particularly, the focus on Total Cost of Ownership and the requirement to develop an action plan."
